

Network Security

Cybersecurity Made Easy

Coro's Network Security is built for distributed and remote workforces and enables organizations to create a secure virtual office, protecting against both external and internal threats. It secures computer networks, and the data transmitted across them by offering a choice of enterprise and military grade encryption VPN and Zero Trust Network Access (ZTNA). These advanced defenses replace traditional hardware firewalls, providing superior protection without the complexity of hardware installation or the need for large IT teams.

Unified Cybersecurity

Resource name	Device labels	Users labels
London office	MARKETING DESIGN	None
Payroll Database	ALL DEVICES	None
Tel Aviv office	None	TEL AVIV OFFICE

Network Security is part of a unified and powerful cybersecurity platform.

- ✓ One dashboard
- ✓ One endpoint agent
- ✓ One AI-driven data engine
- ✓ No integration
- ✓ No headaches

Coro is designed to make your life easier; A single security platform with all the capabilities you need.

Key Features

<p> Zero Trust Network Access (ZTNA) Admins can apply strict security protocols for remote workers by verifying each user, device, and network flow before granting access to corporate resources</p>	<p> Multi Factor Authentication (MFA) Prevents unauthorized access to company resources by requiring users to provide a second form of verification</p>	<p> Trusted Networks Automatically disable SASE on office networks to improve on-site latency and performance, with protection re-enabled when offsite</p>	<p> Access Control Admins control who can and cannot access certain resources from various networks. Maps IP addresses to easy-to-remember domain names</p>
<p> Mobile App Enables ZTNA or virtual private network (VPN) protection and DNS filtering on iOS and Android</p>	<p> Virtual Office Firewall Protects distributed networks with firewall, securing your virtual office</p>	<p> Site-To-Site Tunnels Enables secure communication between the virtual office network and other physical and virtual networks of the customer</p>	<p> Separate Include / Exclude Lists Allows admins to configure separate include and exclude lists for URLs and IPs for full or split tunneling, offering greater control over traffic and security policies</p>
<p> Encryption Strength Two encryption strengths: <ul style="list-style-type: none"> • AES-128: faster, enterprise-grade security • AES-256: slower, military-grade security </p>	<p> Download Mobile Apps via Network Module Console Offers a direct link to download mobile apps, providing a centralized location for quick access and sharing</p>	<p> Multilingual Support Provides additional support for French, Spanish and Italian</p>	

Why Coro?

<p> High Threat Detection and Protection Rate Achieved AAA rating from SE Labs</p>	<p> Easy to Maintain 95% of the workload offloaded from people to machines</p>	<p> Quick Deployment Simple and quick installation, no hardware required</p>
<p> Fast Learning Curve Minimal training, simplified onboarding, user-friendly interface</p>	<p> High ROI No hardware costs, zero maintenance overhead, affordable pricing</p>	<p> High Customer Satisfaction 95% likelihood to recommend - as rated by G2</p>

About Coro

Coro is the easy cybersecurity company. We designed a platform that every lean IT team will master. While other solutions scare people into buying complicated, confusing products, we lead with elegant simplicity. Coro is fast to deploy, easy to use, and designed not to waste your time. Once you install Coro, you'll hardly think about us. That's the point. Coro automatically detects and fixes security problems, so IT teams don't have to spend time investigating or troubleshooting. We're also one of the fastest-growing tech companies in North America, just ask Deloitte.
