

Effortless Payment Tracking for Complex Customer Groups

Features

✓ **Parent-Child Account Linking**

Easily associate multiple child accounts with a single parent account for centralized management.

✓ **Cross-Account Payment Application**

Apply payments received from the parent account to invoices for any child account in that group.

✓ **Refund Flexibility**

Issue refunds to child accounts using the parent account's information for consistency.

✓ **Brand Consistency**

Maintain accurate branding and account details across all related transactions.

✓ **Configurable Account Settings**

Choose which features to activate per national account, such as allowing cash receipt entry for child accounts or defaulting to parent account data.

✓ **Comprehensive Account Visibility**

View transaction history and balances for the entire national account - by individual child or in total.

✓ **Centralized Cash Receipt Management**

Manage all payments for related accounts from one place, reducing complexity and errors.
