Enhance Engagement With Wellness Coach

Articulate, a fully remote SaaS company that develops leading creator platforms for workplace learning, supports employee mental, physical, and financial health with Wellness Coach.

*Cutting Costs, Boosting
Engagement, and
Reaching Every Employee*

THE MISSION & PLAN

As a fast-paced, growing company, Articulate's People Team recognized they needed a way to help employees better support employees' mental wellness while increasing employees' engagement so they could continue to grow and retain their valuable workforce.

Articulate partnered with Wellness Coach in July 2021. Through Wellness Coach's holistic and accessible mobile, web, and Slack applications, personalized 1-on-1 coaching, and fully integrated team-building wellness activities, Articulate saw an immediate utilization rate of 64%.

Engagement rates remained strong into 2022 as a result of continual strategic activities based on key program data, and a package upgrade to provide unlimited personal coaching sessions at no cost to employees. In 2022, Articulate's average engagement rate remains 52%+.

"The Wellness Coach benefit has been a true life change for our employees and by far one of our favorite benefits we offer! Our employees love that the benefit focuses on all aspects of wellness, from emotional, physical to financial wellbeing. The quality of the coaching is exceptional and our employees truly feel connected and supported by the Wellness Coach team."

3 PROVEN ENGAGEMENT STRATEGIES

1. ENGAGING TEAM CHALLENGES

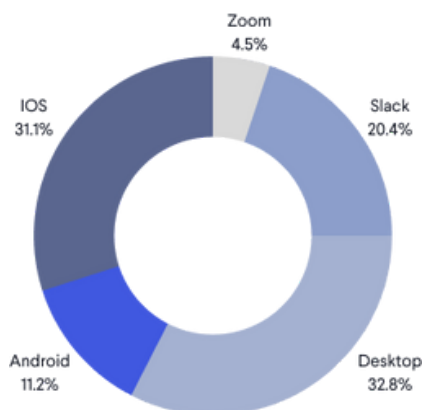

Articulate's program began with a company-wide team challenge. Through customizations, effective communications, and prize incentives, Articulate had nearly half of all employees participate, with 70% completing the entire challenge.

2. WELLNESS WHERE YOU WORK

Wellness Coach offers multiple access points—mobile app, web, and Slack/Zoom apps—for convenient use at work and at home.

3. SHARING THE WELLNESS

Wellness Coach licenses include the ability for each employee to share it with 5 family members or friends to encourage employees to create personal wellness communities and remain engaged.

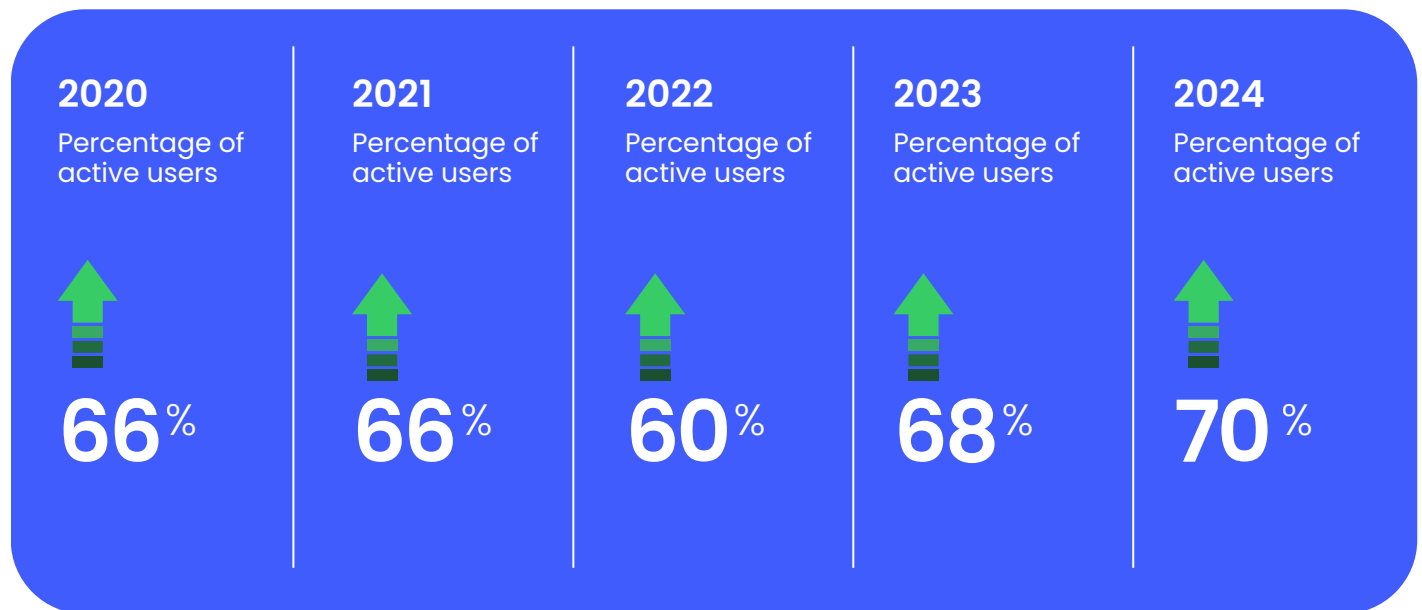

Articulate promoted this perk heavily and as a result 31% of employees have shared their personal licenses.
