

# The AI-native ERP with a team built in.

Automate the accounting work that nobody wants to do, so your team stays lean as your business scales.

## Scale faster

Grow 20x without adding finance headcount

## Eliminate manual work

Stop building spreadsheets. Get instant answers.

## Save money

One platform to replace 5+ tools  
Estimated savings from \$250K - \$1.25M annually.

## Powered by Accounting Intelligence

AI trained on accounting data that categorizes transactions at 95% accuracy.

### Core Accounting

Multi-entity consolidation, automated bank rec, continuous close, and real-time statements in one system.

### Revenue Automation

Automates revenue recognition for any billing model. QuickBooks can't handle it, NetSuite charges \$100K+ for it.

### Custom Reporting

Build reports in 5 seconds, drill to any transaction. No spreadsheets needed.

### Ember AI Agents

There to answer questions, draft commentary, analyze variances, create journal entries, and so much more.

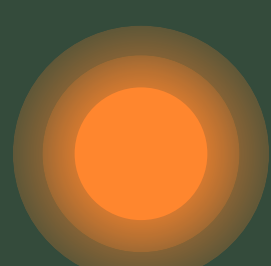

"We reduced our close from 15 days to 3 days. That's 5 months a year back."

Heather Redka | Controller

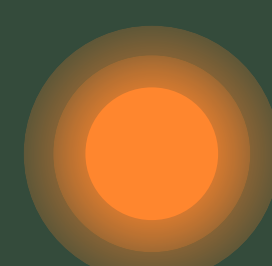

## Switch to Campfire
