labway

LabWay is a mobile-first solution designed to assist phlebotomists and couriers to manage and optimize sample collection and delivery routes.

Providing real-time tools for phlebotomists to easily manage specimen collection and delivery, LabWay improves efficiency and control, with a comprehensive audit trail, ensuring secure sample handling and effective oversight every step of the way.

SEAMLESS INTEGRATION WITH YOUR LIS

LabWay integrates directly with your LabOS platform, automating data synchronization and eliminating manual entry. This connection enables real-time updates on sample status and location, enabling laboratories to add further new stops and analysis to existing samples for couriers en route.

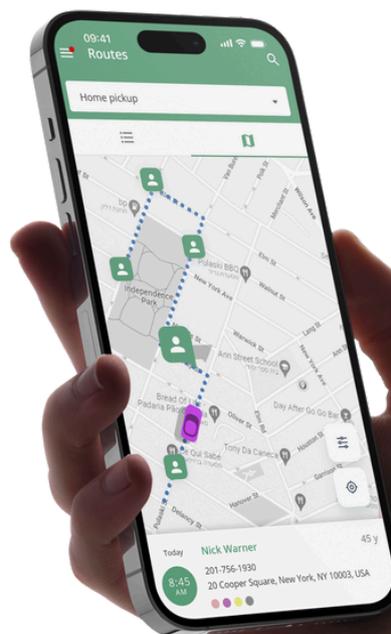

By automating processes and optimizing travel routes, LabWay reduces daily expenses, improves lab efficiency and turnaround times, and enhances overall professionalism, all while maintaining high standards of clinical and operational excellence.

A TAILORED SOLUTION FOR EVERY LAB

LabWay adapts to your lab's specific requirements, capacity, and budget. The platform ensures efficient operations with real-time adjustments for changes in sample volume, resource availability, and testing requirements.

Automated tracking and up-to-date sample status notifications ensure efficient sample handling and accurate transfer tracking.

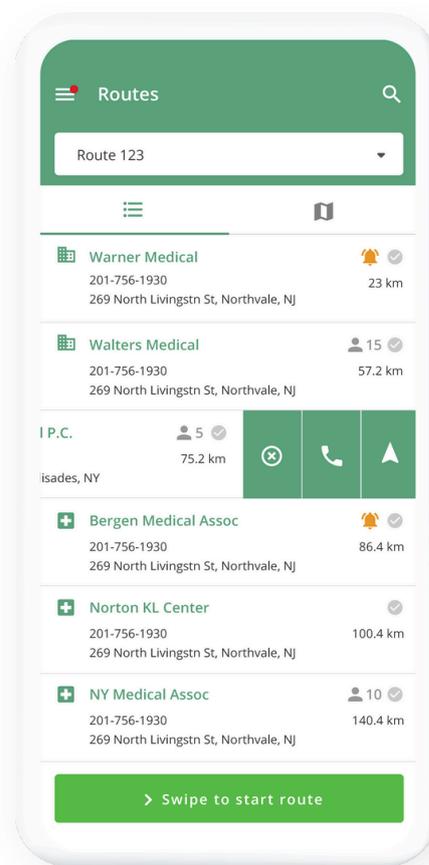

ENHANCED COMMUNICATION WITH LABS, COURIERS AND CLIENTS

LabWay empowers physicians to effectively guide and support phlebotomists and couriers with clear, step-by-step instructions for collecting and labeling samples, reducing errors, and ensuring accurate time-stamping via barcode scanning.

EASILY ADAPT TO CHANGES

LabWay empowers back-office teams with live tracking tools to monitor courier and phlebotomist locations and provide real-time support for smooth operations, including on-demand re-routing and live updates - all integrated inside your LabOS LIS.

STAY AHEAD OF THE CURVE - GET YOUR DEMO

✓ REAL-TIME TRACKING

LabWay offers live tracking and map views of all phlebotomists and couriers, enabling the back office to monitor movements, optimize routes, and make real-time adjustments.

✓ PERSONALIZED ROUTE PLANNING

Customized routes for phlebotomists based on sample type, location, and facility requirements ensure efficient travel and timely pickups.

✓ FULL INTEGRATION

LabWay integrates seamlessly with your LabOS platform, syncing all sample data in real-time to reduce manual data entry, ensure consistency, and streamline lab operations.

✓ SMART SAMPLE COLLECTION

LabWay assists phlebotomists with intuitive tools such as visual instructions, data prompts, and positive patient identification to ensure accurate and efficient collection.

✓ SEAMLESS COMMUNICATION WITH CLIENTS

Phlebotomists and couriers can easily contact facilities or patients for home pickups with a simple swipe in the app and update their estimated time of arrival based on real-time data.

✓ POWERFUL BACK OFFICE TOOLS

LabWay's advanced tracking and coordination tools provide complete visibility of couriers' routes and schedules to back-office teams, ensuring efficient operations and a comprehensive audit trail.
