utila

Modular Stablecoin & Digital Asset Infrastructure for Institutions

Utila empowers fintechs, banks, payment firms, and enterprises to build, manage, and scale digital asset operations. Purpose-built for global money movement with MPC based security, policy-driven governance, embedded compliance, and integrated liquidity access.

Utila provides modular digital asset infrastructure that lets institutions own their stack, protect margins, and maintain direct counterparty relationships.

Our Products

The institutional MPC wallet built for production-grade stablecoin and digital asset operations.

Stablecoin Payments
Run global stablecoin pay-ins, payouts, and cross-border settlement with full control.

Treasury Management
Manage digital asset treasury with MPC custody, granular controls, and unified visibility.

Trading Operations
Operate institutional trading across wallets, exchanges, and DeFi venues from one platform.

Wallet-as-a-Service
Build digital asset products and workflows on secure MPC wallet infrastructure and APIs.

Business Continuity
Ensure resilient operations with mirrored wallet environment and failover infrastructure.

Tokenization
Issue and manage digital and real-world assets with governed lifecycle controls.

Core Capabilities

Utila enables organizations of all sizes to securely manage and build on digital assets with full control and compliance.

Enterprise-grade MPC wallet infrastructure for secure custody.

Granular, policy-driven governance for user and transaction management.

Robust APIs and developer tooling to build on top of our infrastructure.

Multi-chain support and rapid support for new and emerging chains.

Embedded compliance to operate confidently across jurisdictions.

Gas abstraction, batch transfers, and treasury automation.

Direct access to liquidity, rails, and counterparties through Utila Link network.

Deep integrations with exchanges, DeFi, on/off ramps, and liquidity providers.

Everything You Need to Run Stablecoin Payments at Scale

SEND
Execute high-volume pay-outs with governed approvals and built-in gas abstraction.

RECEIVE
Accept pay-ins with clean attribution, automated screening, and real-time visibility.

CONVERT
Swap between fiat and stablecoins anytime and settle directly into bank accounts.

STORE
Custody assets securely in enterprise-grade MPC wallets with full operational control.
