

Thousands of Payments with Just One Smart Request

Let our intelligent API handle the heavy lifting of auto-creating wallets and smart-routing funds across 200+ countries.

Intelligent Safekeeping: Why Our Wallet-First System is Smarter

How do Intelligent Wallets Save You Time?

When you send thousands of payments, some are bound to hit a snag with local banks. Our intelligent API removes that headache. By routing funds through a secure digital wallet first, we ensure the money is delivered instantly. **If a bank transfer is declined, the funds stay safely in the recipient's wallet instead of bouncing back.** You'll never have to track down a "lost" payment again.

Mass Pay API

- **Global Choice:** Multi-currency support with effortless exchange.
- **Tax Reporting:** Automated global tax reporting and 1099-K issuance.
- **Automation:** Intelligent, API-enabled channel incentives.
- **Security:** Secure, encrypted collection and storage of partner banking data via Partner Payee Manager.

Wide selection of payout options:

- Bank transfer
- Prepaid card
- Reward links
- Rapid pay
- Check transactions

Great for :

- SPIF
- MDF
- Rebates
- Commissions
