

# Medrio EDC

**The only EDC for small and scaling teams.**

Medrio's intuitive solution, emergency offline data capture capabilities, and comprehensive data management keep you in control from database build to your final report.

Conduct all your studies with confidence with a fully validated, audit-ready EDC backed by 20+ years of clinical use across thousands of completed clinical trials. We deliver expert support and high-quality data outputs without hidden costs, added complexity, or risk.

At Medrio, our customers come first. We actively engage with our customers, listen to their feedback, and incorporate their needs into our innovative features and functionality.

## **Flexible**

A scalable platform for every study and phase.

## **Proven**

Solutions supporting hundreds of approvals from the FDA, EMA, and other regulatory bodies.

## **User friendly**

Easy to configure, adapt, and manage without a programmer.

**medrio**

## Effortless builds and management

Customers can easily configure, adapt, and manage Medrio without a programmer using our no-code, point-and-click solution. With Medrio, you can go live within hours to days, not weeks to months. Our intuitive system and eLearning modules allow you to feel comfortable after just one training session. With our code-free base and study copy functionality, setup is quick and build speed increases over time.

## Efficient mid-study changes

Medrio's multi-tiered build and test environments allow users to quickly understand how changes impact existing workflows. With total control, you can ensure seamless implementation without data migration, vendor support delays, or system downtime.

## Accessible data

Medrio delivers near real-time access to data so teams can monitor progress and respond proactively. Permission-based reports, dashboards, data visualizations, and single-click exports streamline collaboration and keep you informed.

### BUILD

- Configurable, point-and-click builds
- Customizable user administration
- Pre-built study template library
- Study and form copy functionality

### TEST

- Forms preview and role toggle
- Form rules and query testing
- Always-on validation environment

### CONDUCT

- Near real-time data access
- Targeted monitoring workflows
- Unplanned offline data capture

### LOCK

- Global regulatory compliance
- Flexible data export options
- Single-click submission casebooks

*“Medrio excels when timelines are tight. Unlike other difficult systems requiring endless reference guides, Medrio’s setup is quick and intuitive—everything is clearly spelled out, making it easy to get your data ready fast.”*

Director of Clinical Data Management, Biotech
