

The Smarter Way to Geocode and Visualize Your Data

Kadince helps financial institutions save time, streamline their process, and better visualize data—all in one secure platform.

With Kadince, you can:

- Upload any .csv file that contains addresses and geocode in bulk or batches
- Automatically populate FFIEC demographic data and census tracts
- Create interactive maps with census tract and demographic layers
- Layer maps by income levels, majority-minority census tracts, loan type, geography, and more
- Visualize patterns and see where your institution has made an impact or may indicate fair lending concerns
- Export maps and geocoded data so you can prepare for regulatory exams

Everything your team needs to manage complaints and other feedback securely, efficiently, and at scale.

-  Unlimited users and data storage
-  Enterprise-grade security and data privacy
-  Ongoing customer support
-  Easy import/export tools
-  Automatic updates and new features
-  Dedicated onboarding and training

“Kadince is super simple to use and understand!! The support team is also a great resource to lean on if there are any questions or issues with Kadince.”
