

# What's New in RealCISO 2.0

Compliance intelligence.  
Not compliance software.

*For MSPs, MSSPs, and vCISO consultants managing compliance across dozens to hundreds of clients, RealCISO 2.0 is the compliance intelligence platform that creates speed and velocity in assessment delivery.*

## Assessment Speed & Velocity

- AI assessment engine runs assessments end-to-end – maps controls, generates remediation, scores maturity
- “Simulate project” ranks every gap by real score improvement – no guesswork
- One project, infinite frameworks. Assess HIPAA + NIST CSF simultaneously. One evidence set, zero duplicate work.

## Portfolio Intelligence for Partners

- Multi-tenant architecture – manage hundreds of clients in one instance with rollup visibility
- White-label ready: custom domains, logos, report branding under your brand
- Simple per-client-org billing with Starter and Premium tiers

## L1 – L5 Maturity Trajectory

- Track client progression from Ad-hoc (L1) to Optimizing (L5) – per control and aggregated
- Evidence expiration signals flag when proof is stale before auditors do
- Move beyond binary met/unmet to continuous improvement your clients can see.

## Visible Compliance Intelligence

- Bi-directional risk-control mapping: see impact of every control on all linked risks
- Immutable report versioning with full audit trail (AI/manual/restore tracked)
- Transparent scoring: users see exact questions contributing to their score. No black box.
