How Precision Plus *Elevated Security, Compliance & Front-Desk Efficiency* with Visitly

Automated visitor management built for enterprise-grade facilities

ABOUT PRECISION PLUS

World-Class Manufacturing Demands World-Class Operations

Precision Plus is a leading U.S. manufacturer of precision-machined components serving the medical, aerospace, automotive, and industrial sectors. Operating a world-class facility with 1,800+ employees, the company manages a high daily volume of partners, suppliers, and clients in a security-critical environment.

For an organization built on precision and accountability, manual sign-in sheets weren't just inconvenient — they were a liability. Precision Plus needed a platform that could automate compliance, tighten on-site visibility, and deliver a professional first impression to every visitor.

THE CHALLENGE

Manual Processes Couldn't Keep Pace

Before Visitly, front-desk operations lacked the advanced tooling a modern, high-security manufacturer requires. The gaps were creating measurable risk across compliance, security, and visitor experience.

- Manual sign-in lacked the user-friendly, advanced features needed for efficient front-desk operations.
- No reliable contactless check-in options — a growing need in a post-pandemic operating environment.
- No centralized system to capture NDAs and safety agreements before visitors entered the facility.
- Limited real-time visibility into visitor activity created compliance exposure and slower, less informed host responses.

FAVORITE FEATURES

● Facial Recognition Check-In

● Contactless Entry

● Host Notifications (Email/Text)

● NDA & Document Collection

● Real-Time Dashboard Analytics

THE SOLUTION

Purpose-Built for Enterprise-Grade Operations

Precision Plus deployed Visitly after a free trial that immediately demonstrated the platform's advanced capabilities and seamless fit at enterprise scale. Setup was complete in hours — no lengthy onboarding, no complexity.

Continuous product improvements and a responsive customer success team gave the team confidence that Visitly would scale with the business. For a tech-forward manufacturer, that combination of power and simplicity was exactly right.

"Visitly gave us the ability to closely monitor visitors throughout our facility and allowed us to integrate our required materials into the software, keeping everything organized and streamlined in one place."

Will Sanchez · Client Relations Manager, Precision Plus

WHY VISITLY

The Modern Standard for Enterprise Visitor Management

Visitly is the enterprise-ready visitor management platform that security, operations, IT, and workplace teams trust — secure, scalable, and effortless from day one.

- Enterprise Security
- Instant Deploy
- Real-Time Insights

RESULTS & IMPACT

Immediate, Measurable Gains Across Every Dimension

From day one, Visitly delivered concrete improvements in security, compliance, and operational efficiency across the facility.

- Enhanced Security & Monitoring**
 Full, real-time on-site visibility into every visitor. Photo-enabled host notifications enable faster, more informed responses at every entry point.
- Streamlined Compliance**
 NDAs and safety agreements captured digitally in one place — eliminating compliance gaps and reducing administrative risk across the facility.
- Front-Desk Efficiency**
 Manual sign-in replaced by fully automated, contactless workflows — freeing reception staff from bottlenecks and eliminating process delays.
- Actionable Analytics**
 Real-time dashboard charts surface visitor patterns by time, day, and host — giving teams data to optimize staffing and continuously improve operations.
- Superior Visitor Experience**
 Employees and visitors are highly satisfied with the modern, professional platform — reinforcing Precision Plus's commitment to operational excellence.
