About RPNOW

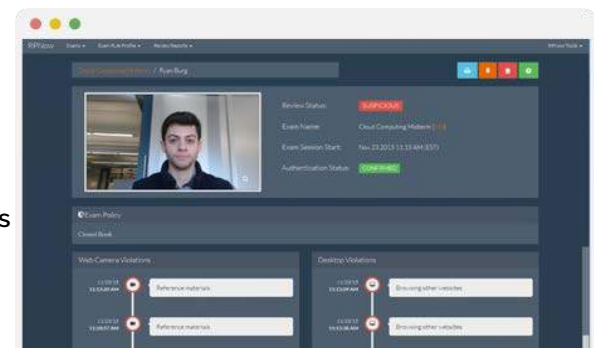

RPNOW is an on-demand, cloud-hosted SaaS solution for exam proctoring that offers all the benefits of secure, fully-proctored testing in remote learning environments – but without the costs and inconveniences associated with test centers or scheduling live proctored test appointments. Using a standard computer webcam with an internet connection, anyone can take a proctored exam through their LMS – anytime, anywhere. Institutions can offer exams when it's convenient for them and their students – with full confidence that test takers are doing their own work without outside help.

RPNOW Features

- On-demand proctoring
- Student identity verification
- Configurable locked down browser and electronic security
- Flat exam fee
- Works on slower internet speeds
- LMS integration via LTI app
- Third party integration support
- Proctored exam result dashboard
- Exams reviewed by certified proctors
- Furnish videos of proctored exams
- Worldwide support 24 x 7 x 365
- Live chat service
- Professional services

Effortless exam registration for faculty/admin

Proctored exam results with flagged violations in LMS

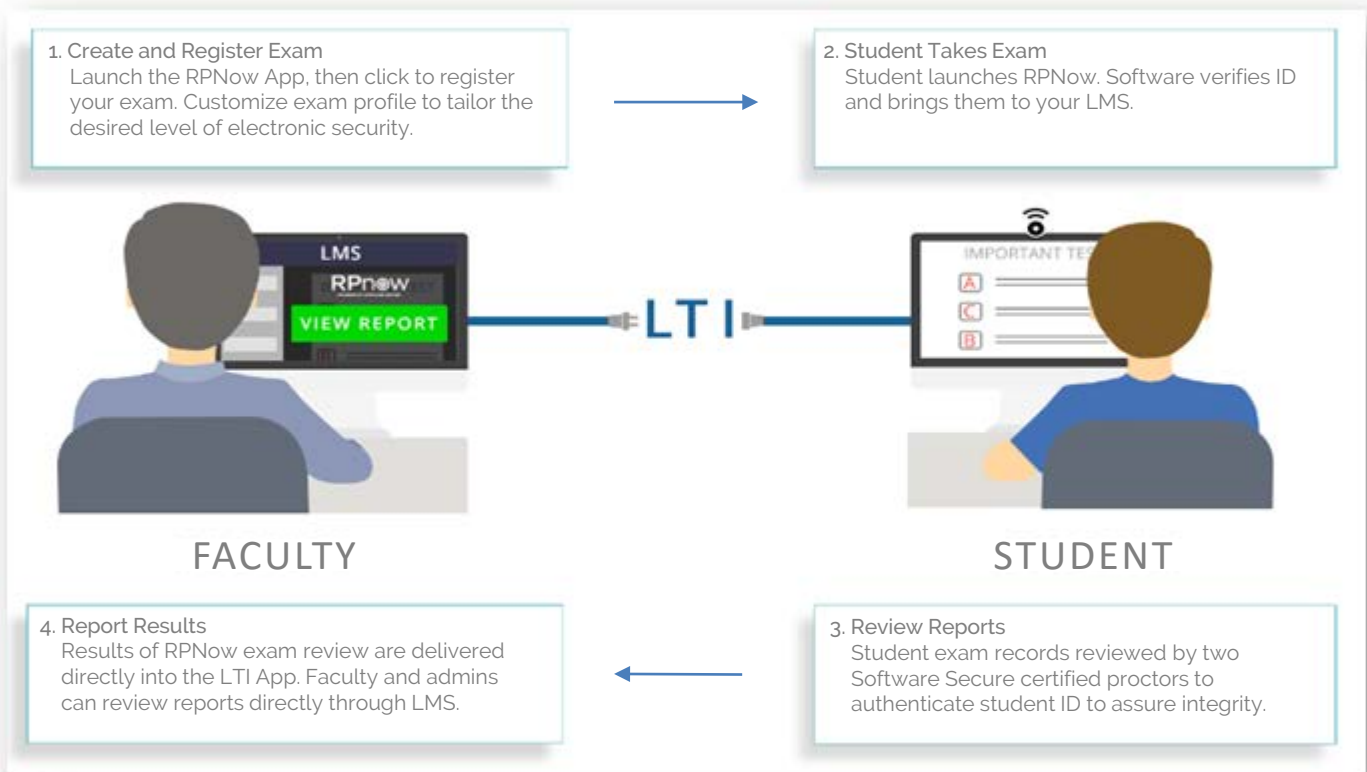

"We're delighted with our partner Software Secure, who have an asynchronous approach that can scale very quickly to thousands of learners. We now have thousands of learners that have gone through the virtual proctoring approach at edX for credit."

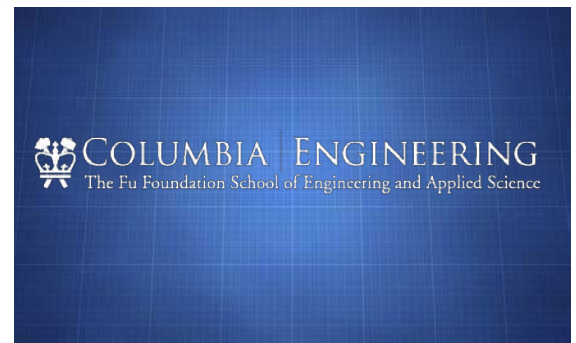

- Anant Agarwal, CEO, edX

When integrated with your LMS, RPNOW takes the pain out of proctored exam administration, and replaces it with efficiency and flexibility. See how it works:

Case Study: Columbia University

The Columbia School of Engineering implemented Software Secure's online proctoring solution, RPNOW in 2014. Integrated with their Canvas LMS, RPNOW allows the Engineering Program to efficiently and conveniently run a platform for proctored exam management. RPNOW enables Engineering students from around the world the flexibility to take a proctored exam anytime – anywhere with integrity. "Staff like the fact that exam management is done through Canvas and reviewing proctored exam results is easily managed through the RPNOW dashboard," said Nancy Rubin, Executive Director of Distance Education, Columbia University | Engineering.
