

Jive-n: The Interactive Intranet Where Employees Thrive!

Jive-n is the world's first interactive intranet. It combines the structured content and communication of traditional intranets along with the natural connections and collaboration of enterprise social networks and go-anywhere ease of consumer-style mobile apps, giving employees one place for everything they need to get your their jobs done.

Jive-n works wherever you do, and it works with your essential systems and tools, too, providing unified collaboration across your IT landscape. It's incredibly quick and easy for companies of any size to set up, deploy and start using, solving your business challenges and delivering big increases in workforce productivity, engagement and alignment from day one.

With Jive-n You Can:

- Replace a Traditional Intranet
- Modernize an Existing Intranet
- Create an Employee Community
- Implement Team Collaboration

7x

A Leader in the Gartner Magic Quadrant 7 times in a row.

50%

Half of the top 10 Fortune Best Companies To Work For use Jive-n

61%

80%

The average percentage of intranet development cost reduction when implementing Jive-n.

Recently awarded a patent for Jive's enterprise search capabilities

"We had to find a way to break down the silos and introduce a platform that allows staff in 28 countries to better communicate and collaborate. [With our Jive-n Interactive Intranet] we really hit fertile ground. We had a **97% adoption rate in four months.**"

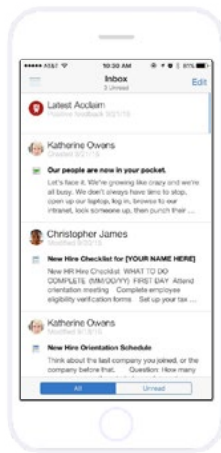

FICO

Easy Set-Up and Administration

Configure a next-generation interactive intranet in days or weeks, not months. Deploy it right out of the cloud. Reap immediate value and ROI.

Business Accelerators

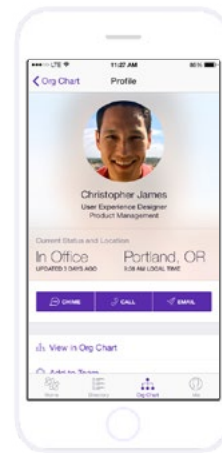

Empower your team, department or office with sites and pages that accelerate key business processes. Launch them in hours—no IT help needed.

Jive Mobile

jive daily

jive circle

Total Mobility

Your Jive-n interactive intranet is wherever you are, with secure, consumer-style apps that keep you connected and informed everywhere. Each app is purpose-built to solve specific business challenges and is fully integrated with Jive-n.

- **Jive-n Mobile:** Discuss and contribute, create and share content
- **Jive Daily:** Stay informed with a dynamic company news app
- **Jive Circle:** Find the people you need in a mobile employee directory

An Integrated Hub

Jive-n bridges your IT infrastructure and breaks down silos, providing cohesive collaboration across systems of record, apps and devices. With our deep functional integrations, people can use all their favorite apps and tools while staying connected and in sync.

Ready-to-use integrations are available for Microsoft, Google, Salesforce, Box, Cisco and more.

Wall-to-wall insight

With one intranet spanning desktop and mobile systems, Jive-n gives you unprecedented visibility into processes, interactions and engagement across your business. Powerful, easy-to-use analytics tell you what's working, what's not and how to improve.

Capabilities

News Streams & Blogs

Intelligently deliver relevant corporate information and executive blog posts employees need to stay aligned, informed and engaged.

Analytics & Insights

Gain meaningful insights by measuring reach and impact of every communication. Social data collected over time also powers intelligent in-context recommendations.

Support & Self-Help

Simplify support, cut costs and enhance employee satisfaction with easy-to-use, best-in-class self-help and peer-based assistance.

People & Expertise

Create rich personal profiles by integrating with LDAP or any third-party systems to deliver a single source of profile information that enables finding experts much faster.

Social Search & Content Promotion

Social search capabilities and content promotion provide prioritized and recommended content based on what's important to you, your team and the projects you're working on.

Connection & Collaboration

Give employees the tools they need to connect, share ideas and take action: groups, project spaces, discussions, document collaboration and more.

Security

Enterprise-grade security; ISO 27001:2013 certified.

Replace a Traditional Intranet

"When we replaced SharePoint with Jive-n, we got not just an intranet but a social intranet, and it took off like wildfire. It's become the heart and soul of our organization, making us more open and collaborative."

More customers who replaced their traditional intranets with Jive:

Modernize an Existing Intranet

"SharePoint has good document storage and custom list capabilities. Jive is better at supporting information discovery and sharing, discussions, and social interaction. Jive's ability to integrate with SharePoint means we can provide a seamless user experience regardless of which environment you're working in."

More customers who modernized their intranets with Jive:

Create an Employee Community

"We have completely rebuilt our collaboration and knowledge suite using Jive-n. It's improved productivity and created stronger alignment. Thanks to Jive we created a village with 35,000 people."

More customers with a Jive-based cross-company employee collaboration solution:

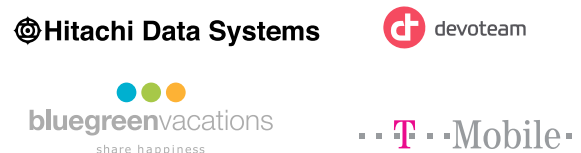

Implement Team Collaboration

"Within three weeks we had more Jive-n users than we had in over two years with a SharePoint team site. It's solved so many problems for Cameron, from communication to effectiveness. I can't believe we didn't do it sooner."

More customers who use Jive-n for team collaboration:
