

Remove the Guesswork and Stay Focused on What Matters

WorkWave Route Manager® with GPS integration now provides continuous LIVE ETA Updates to alert you if a driver is on time or behind schedule based on their real-time location.

UNLOCK THE POWER OF ROUTE PLANNING, GPS TRACKING, AND MOBILE

Meet customer expectations and provide accurate updates with Live ETAs that sync every minute.

Improve driver accountability with real-time monitoring in one place.

Increase efficiency by saving time on the road and in the office.

Locate assets at anytime with detailed bread-crumbs trail activity so you can respond and react faster.

Minimize drive time - fit more orders in or spend more time with your customers.

Reduce costs - less mileage, less overtime, less wear and tear on vehicles.

Increase on-time arrivals and minimize rescheduling requests with optimal route plans.

Monitor driver behavior and protect your business - identify speeding, harsh braking and other risks.**

Compare planned vs. actual to identify any gaps in your plans and make smarter adjustments.

LIVE ETAs. WE'LL GET YOU THERE.

IMPROVE ACCURACY: REMOVE THE GUESSWORK

Have more confidence that the time-windows you've planned for are being met. With visibility on driver status and location, you'll never get caught off guard and you'll have accurate ETAs at your fingertips.

PROVIDE BETTER SERVICE: GO BEYOND EXPECTATIONS

Knowing where your drivers are at all times and when they will arrive at the next stop will help you make better judgment calls. With Live ETAs you view real-time progress, so you can choose to reschedule or give a heads up that your driver is behind. Your customers will appreciate the extra notice!

PREPARE FOR ON-DEMAND REQUESTS: REACT AND PLAN ON-THE-FLY

When last minute requests come through, Route Manager can fit in the order to the best available resource based on GPS positioning. You can schedule on-demand requests to meet customer demands while staying on time to meet previously scheduled orders.

ROUTE MANAGER 360 + GPS TRACKING: NOW WITH LIVE ETAs

Stay updated on your drivers' activity after they hit the road. Driver stuck in traffic? Did the stop go over by 15 minutes? Live ETAs will alert you when unexpected events arise and impact the rest of the day. Based on the driver's GPS location, you will receive continuous updates so you can make smarter decisions, sync on-the-fly changes to drivers' mobile apps and keep your customers informed.
