The Many Faces of Teem

Like a talented actor, Teem can take on a variety of different roles in your office and help solve problems that your employees struggle with daily.
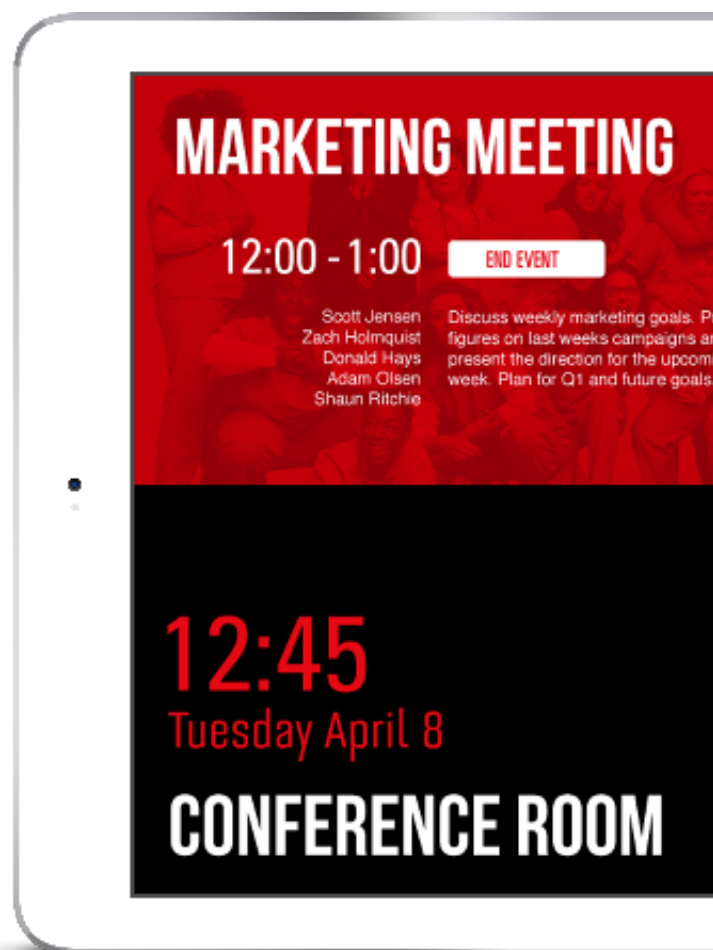

- Are the meeting scheduling and conference room booking processes at your company a mess?

- Want to get more out of your existing workspace and meeting room resources?

- Wish there was a better way to check in and help direct the visitors who come to your office?

- Looking for more insight into how your business meets and collaborates?

To give you a better idea of how this tale of improvement unfolds, let's shine the spotlight on some of Teem's key players.

EventBoard /
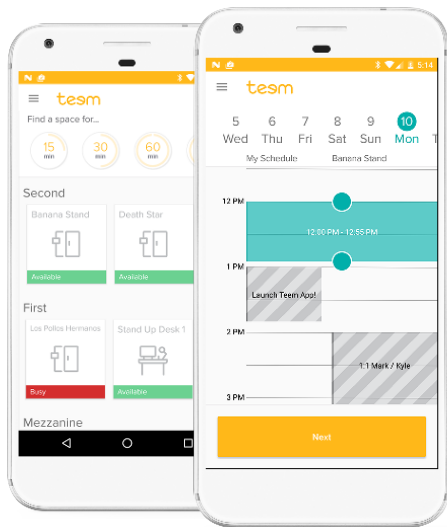

Conference Room Displays and Management

Our original app makes it easy to manage meetings and conference rooms by transforming iPads or Android tablets into customizable digital displays that connect real-time with Google Apps, Exchange and other calendars. The intuitive interface shows end users what meetings are coming up and lets them book new ones right from the display.

LobbyConnect /

Visitor Management System

This app runs on iPads and provides a secure, web-based interface that simplifies the check-in process for visitors, while keeping track of who is visiting your office and when. When a visitor arrives, LobbyConnect presents them with any relevant contracts (like NDAs) and lets the person they're visiting know that they've arrived.

Teem /

Book Conference Rooms and Desks on the Fly

With Teem's mobile app, end users can quickly find and book a desk or a meeting room with the capacity and equipment they need — even when they're nowhere near an EventBoard display — with just a few taps on their mobile device.

Flightboard /

Browser-Based View of Available Meeting Rooms

Inspired by airport flight status monitors, Flightboard shows real-time statuses for the meeting rooms on a particular floor, building or campus, displayed either as a list or as a color-coded map. Pull it up in your browser, or share it to a TV monitor in a central location so everyone can see which rooms are available.

Did You Know?

Teem's cloud-based platform makes meeting easier for thousands of companies around the world, including Airbnb, Box, Pinterest and Squarespace. Successful businesses use Teem to optimize their workspaces, save millions and help employees work more efficiently.
