

"Alma is the best of the best."

Micah DeVries, Technology Administrator

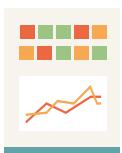

Alma simplifies school management and empowers K-12 schools and districts to achieve academic excellence and equity by modernizing their entire core information infrastructure: SIS, LMS, Communications, Student Analytics, and Data Visualization.

Enjoy increased visibility of meaningful and understandable student and school-wide information.

Alma creates transparency and awareness around what is occurring at both a student and school-wide level through graphical data visualization and embedded communication tools.

Look forward to a seamless transition to progressive instructional practices.

Alma meets educators where they are today and supports strategic progress towards their goals of tomorrow.

Experience hassle-free reporting, from state-mandated to one-off custom exports.

We support more accurate reporting with easier and intuitive data collection. Alma also offers multiple ways to get your data out of the system, including push-button state reporting.

Rethink SIS.

One Platform. Hundreds of features. Limitless insight.
