

The keys to protect your business from cyber attacks

Get your data under lock and key

The danger is real.

Safeguard with Professional Security Survival Tactics

Today's biggest threat to businesses isn't competition or changes in market, it's cyberattacks. In 2016, 62% of all cyber-attacks were on SMBs, about 4,000 a day,¹ changing the discussion about cybercrime from "if" to "when."

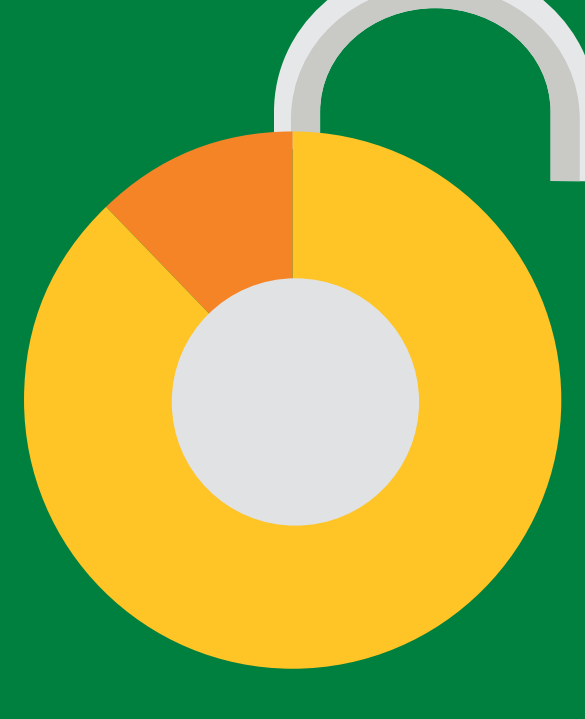

The cybercriminals prey on the unprepared.

SMBs usually do not have the resources or expertise to handle cyberattacks.

79%

Feel their company's ability to handle cyberattacks isn't highly effective²

66%

Say cyberattacks evaded the SMB's intrusion detection system⁴

50%

Employees impacted before a network administrator can act³

The financial impact of cyberattacks can be catastrophic for businesses:

191

Average number of days a hacker has access before they are detected⁴

\$1MM

Average amount SMBs spend because of damage or theft of IT assets²

\$1.2MM+

Average cost to SMBs due to disruption of normal operations²

60%

companies go out of business within six months after a cyber attack¹

Business-grade security needs full-featured protection

More than 1/3 of businesses⁵ have turned over management of their wireless local area networks to third parties so they can have the reliability and security they need to protect their businesses.

Some of the benefits of using a service provider include:

Cloud-managed cyber protection

Reduced IT costs

Segmented employee and customer traffic

Real-time threat protection, analysis and detection

CenturyLink® Managed Enterprise with Cisco Meraki® lets you work without worry.

A recent survey reported expectations that the network user population to grow at a double-digit rate annually over the next two years⁵, increasing the complexity and demands on network security.

Enable reliable, cloud-managed Wi-Fi security for your business with a rich portfolio of features like:

Centralized Management

Software updates, performance and patch management

Zero-touch Cloud Provisioning

Cloud managed security

Application Control

Prioritize applications

Location Analytics

Reveal metrics monitoring wireless devices

100%

And with CenturyLink you get **100% cloud-managed solution installed, monitored and maintained.** Prioritize security so you can prioritize business.

Be on top of the latest security threats with a solution that provides **cloud-based feature updates**, which ensure your internet access is always protected.

Get reliable security and Wi-Fi from CenturyLink® with the benefits of Cisco Meraki®
