price is per user, per month (prices do not include VAT)		
ɫ = paid up-front		
ɫɫ = contractual agreement for agreed period		

Frequently Asked Questions:

Is the price per one user or one company?
The price is per user. The cost for a whole company is Price x Number of users. For example, 20 users in Base package will be 20 x = /month

Can I choose Base at first and then switch to Automation?
Yes, you can change your decision at any moment. Remember, that the switch will affect all user of your CRM, you cannot choose to upgrade or downgrade for chosen people, but for all. Downgrading will not be connected with refunds or prolonging paid time.

Can I pay for more time upfront and get a discount?
Yes, such option will be available to you when you decide to pay for your account. Starting from 6 months and up, we will give you an automatic discount.

Is it possible to have some users on Automation and the rest on Base?
No, every user in the company has to have the same option, either Base, Automation or Enterprise.

What is the difference between basic and extended customized changes in Automation and Enterprise?
In Automation, we offer some custom modifications, usually later introduced to the rest of our clients, or alterations that won't interfere with the code of the app that much. In Enterprise, we offer modifications that may interfere with the code significantly and require more work. It allows for better Livespace adjustment to your company. API integrations can be performed by us or someone from your company in every package.

Can you provide Livespace individually only for our company?
Yes, we can do that. It is the best scenario when it comes to big companies, which have to store data in their internal infrastructure. We can start such process for companies with at least 100 accounts, based on Enterprise tariff**.**
