Frequently asked questions

What is a Content Item?

Content Items are any piece of content you put into the system. Shared content like blog posts or any other content you add based on a content definition, pages, assets, these are all different types of content within Agility CMS.

What are Channels/Sitemaps?

Channels or Sitemaps allow the control of multiple sitemaps within the page management component within a single Agility CMS instance. This allows for easy management of additional websites. Each of these channels shares the same users, content, and assets vs using a separate Agility CMS instance which separates these. Having multiple sitemaps in the same instance can be really useful when you want to use related content to relate a lot of content but you still

Can I use the free edition for a production solution?

Yes! If you can build your commercial solution within the limits of the free edition please jump on board! Be careful of the hard limits, the API will not charge for overages in this package so if you hit your limits your API will be blocked. Keep in mind, we do notify you when you hit 80% of your limits so you should have lots of

Do you have a discount for a not-for-profit organization?

Yes, we do! We are driven to support our community and give back wherever we can. If you are looking for more details on this discount, please reach out to us

What are the payment methods and options?

All packages are charged monthly and are month to month terms. If you have overages those are also charged on the next monthly bill. Upgrades are prorated to the monthly renewal date. We accept American Express, MasterCard, and Visa Credit Cards.

Enterprise packages can customize invoices, terms and handle specific legal

What onboarding and support packages are available?

We offer several advisory, adoption and support plans to our customers to ensure they start off on the right foot and continue to take full advantage of the Agility CMS platform. These packages are only available to our Pro and Enterprise packages

Can I install Agility CMS on-prem?

No, Agility CMS is a Multi-tenant SaaS platform. This allows us to ensure all our customers are on the latest version and also manage the entire hosting solution around the Agility CMS platform itself. The power of our system is that you build your solution (website, app, etc) through our APIs and therefore it can be hosted in any location you choose. This allows you to host things like your website on-
