TalVista™

Seeing beyond the obvious

Pricing information

We recommend beginning with our Pilot of either 60 or 90 days. The 90 Pilot includes proctoring with A/B testing. Pilots pricing is dependent on the number of modules you plan to pilot. The price range is $5000-$35,000.

Some of our clients choose to skip the Pilot and proceed directly to a multi-year enterprise software license. Enterprise pricing is based on the estimated number of hires planned for the year and which modules will be included and the number of years. The price range for the software license can be $15,000-$500,000 per year.

In order to provide our prospects with the most accurate pricing, it's important to hold a short scoping call to understand the business and use case. During this call, we'll also discuss our implementation process and fees and whether in integration with an ATS, CRM, or Recruitment Marketing platform is needed and the fees associated with the integration.
