## Add on

Concurrent viewers\*\* \$995 for 5 users/year

\*Users - Those who need to create reports and dashboards. The base pack starts at 2 users.

\*\*Concurrent viewers - Those who only wish to view published dashboards and reports. Each concurrent viewer license is equivalent to one concurrent user session that can be established to view published reports or dashboards.

The final price is calculated based on the total number of users and concurrent viewers.

Eg: If you need a quote for 2 users and 5 viewers, it would cost you (\$2395+\$995) in annual subscription.
