Online Invitations

Beautiful RSVPs and forms that connect right to your guest lists for seating and check-in.

Guest Lists & Seating

Guest lists and seating charts synced directly to your invitations and check-in.

Event Check-In

Fast, reliable, and secure guest check-in tools for professional events of all sizes.

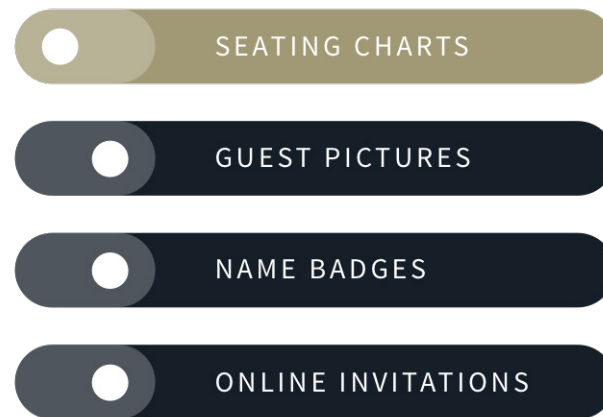

Team Admin & Support

Powerful security and compliance tools, and zkipster team experts ready to help.

Turn on or off any features that you want for your event.

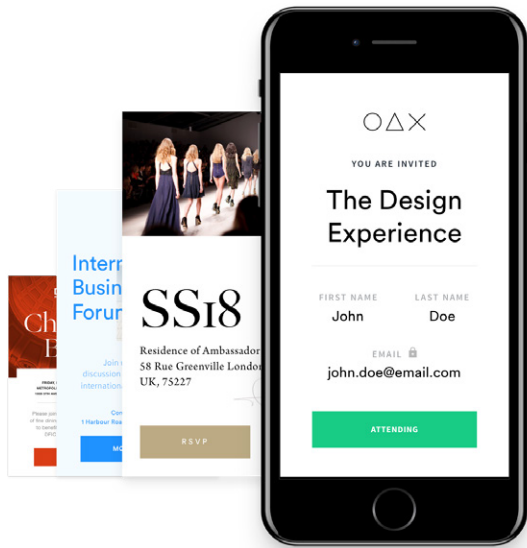

Every feature is designed to be simple to use, but with more expanded options when you need them.

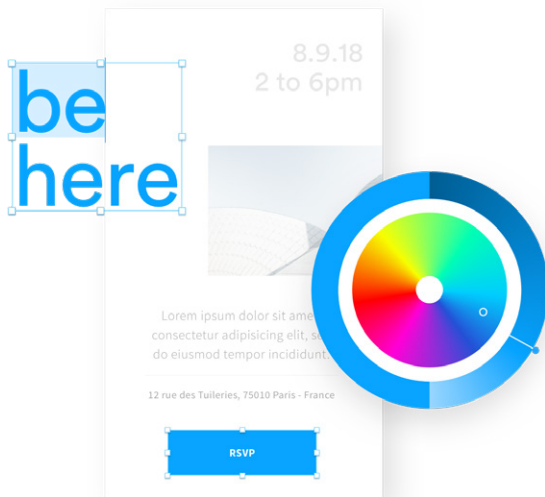

Online Invitations

The easiest way to manage online invitations. Beautiful RSVPs and forms that connect right to your guest lists for seating and check-in.

Beautiful emails and registration forms

Create unlimited RSVP emails and guest response forms, save the date, and other event emails in minutes. Start with popular templates, create new designs, or simply upload custom HTML invites.

Customize all the details that matter

Easily adjust any detail to be on brand, from fonts and colors to logos and images, and send emails from your preferred domain.

700 RECIPIENTS

● DELIVERED 500 ● SOFT BOUNCE 100 ● HARD BOUNCE 50 ● MISSING EMAIL 50

500 DELIVERED OF 700

● CLICKED 100 ● OPENED 350

See what happens to your emails after you click send

Track RSVP progress through a clear dashboard that tells you who has opened, clicked, or not received your online invitations. No more blind spots.

A screenshot of the Zkipster guest management interface. It features a dark header with 'GUESTS', 'ALL GUESTS', 'FILTERS', 'ALL GUESTS', 'ACTION', and a search icon. Below is a table with columns for NAME, GUESTS, TABLE, SEAT, and a trash icon. The table lists six guests: Jane Drew, Dustin Smith, Sara Ledou, Aaron Doe, Joy Murat, and Adam Jones. To the right of the table is a decorative graphic of overlapping circles in various colors.

	NAME	GUESTS	TABLE	SEAT	
	Jane Drew	1	8	1	
	Dustin Smith	2	4	2	
	Sara Ledou	2	1	2	
	Aaron Doe	4	3	4	
	Joy Murat	1	4	1	
	Adam Jones	2	7	2	

Make invitation list management a breeze

Your invite lists automatically become dynamic guest lists with clear status updates for invites, guest activity, live on-site management and post-event insights.

Thousands of event professionals trust zkipster

Email delivery optimization

Reliable, industry-trusted tech ensures your emails land in inboxes, not spam folders.

Private and secure data

Your data is protected by cutting-edge technology and a vigilant digital security team. [Read more](#) on zkipster and GDPR compliance.

“zkipster has been revolutionary! We are delighted with how easy it is to use, both on the web and application.”

Emma Mills — Tate London

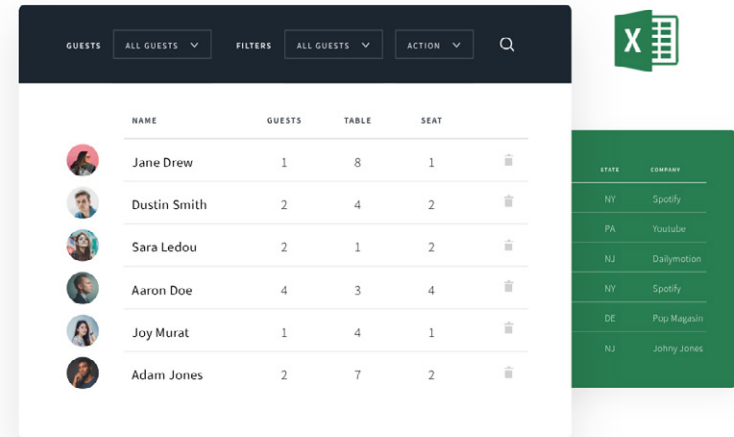

Guest Lists & Seating

Guest lists and seating charts synced
directly to your invitations and check-in.

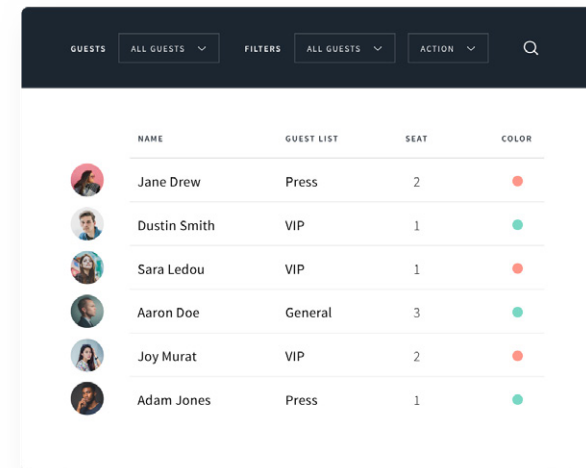

Easy import and export, with data that stays yours

Create events, guest lists, and guest profiles in minutes with simple templates, or easily import from spreadsheets. It's just as easy to export anything back out.

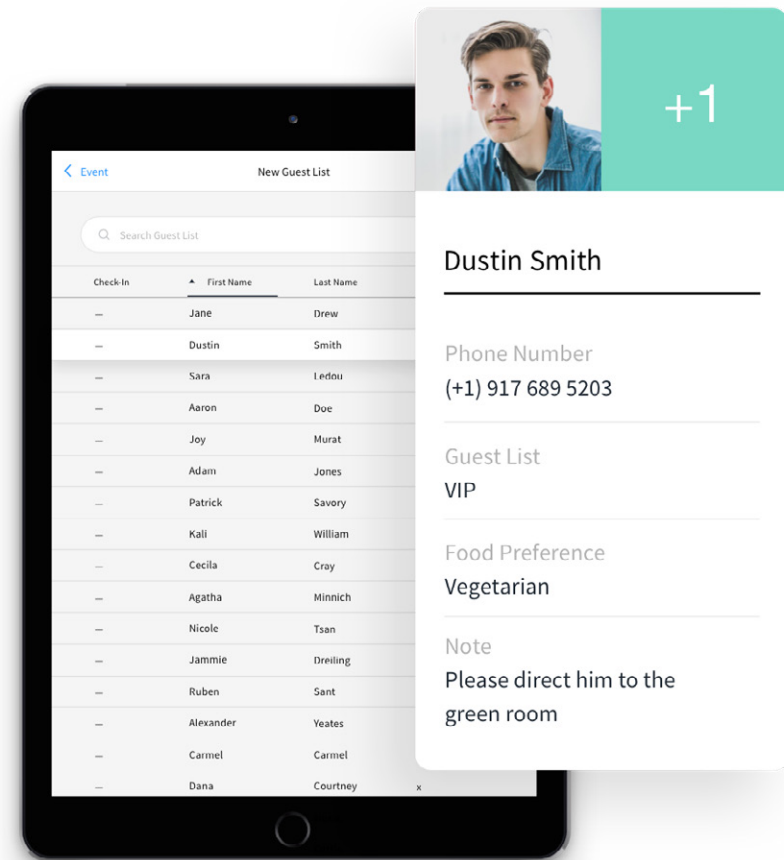

Organize your guests with multiple guest lists

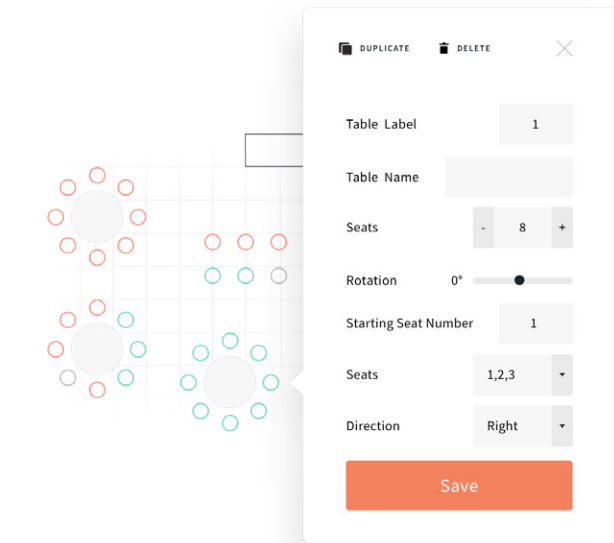

Organize guests into general admission, press, sponsor, VIPs or whatever lists make sense, and see at check-in how many guests from each guest list have shown up.

Add in-depth guest profiles to support your guest management

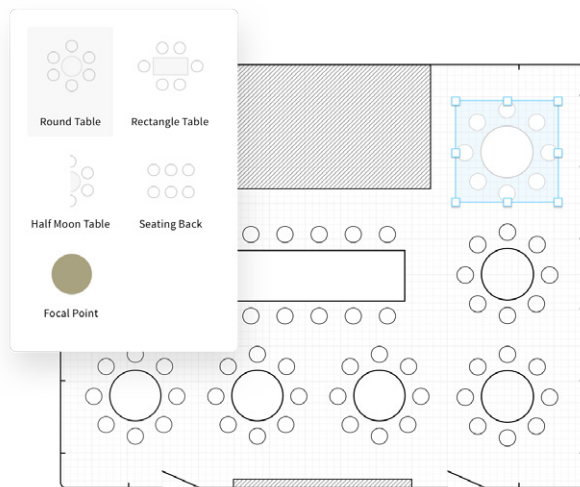

Store whatever guest data you need in the guest list manager, from contact info to pictures using zkipster's picture sourcing, and add any other custom details. Mark any details private you don't want to appear at check-in.

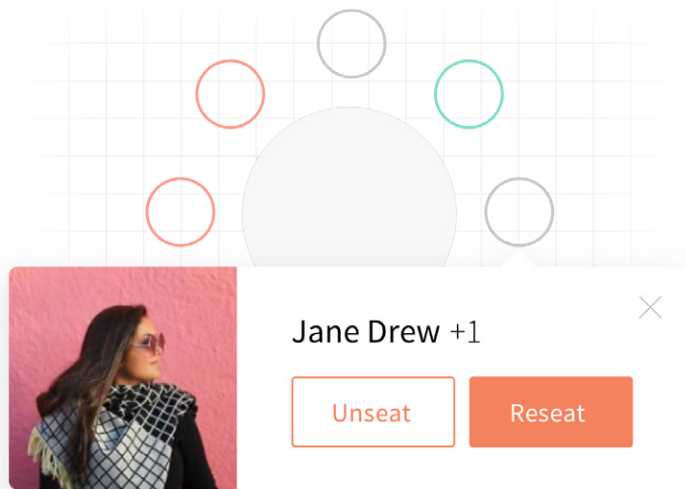

Create any seating layout in minutes

Add or edit tables, expand, rotate, and label seating floorplans for any venue with the easy seating chart editor.

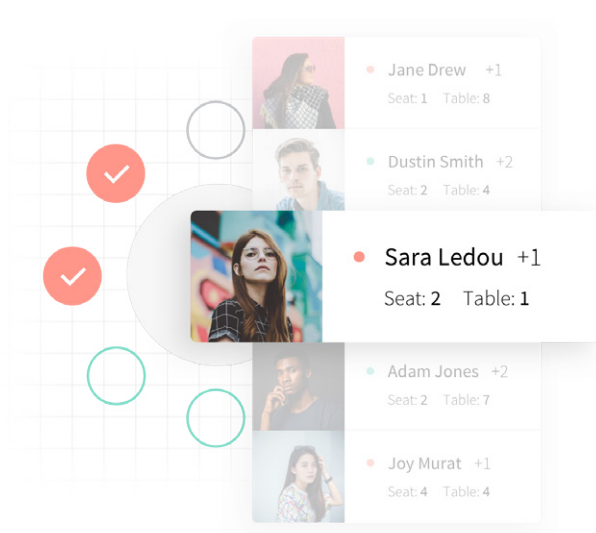

Add, customize, and print venue floor plans

Work with any venue, hassle-free. Just send us the floor plan of your venue, and we'll get it ready for you to add seating and print individual tables or the whole overview in no time.

Edit seating charts on the fly with synced guest info

Assign guests to tables straight from your list, and collaborate on seating assignments in real time with your team or clients.

See where a guest is seated directly from their profile

No need to open the seating chart every time. Seating info is saved in the guest profile at check-in, and can even be sent automatically to guests upon arrival.

zkipster is easy to use for teams and agencies

Flexible access roles for collaborators

Assign roles like editor, viewer, and check-in only to your team and clients for easy collaboration where everyone has access to what they need.

Sensitive guest and event data stays private and secure

All guest data is secured on banking-grade cloud servers. Your guest lists are safe and sound on zkipster.

“zkipster does not just make the concept of managing guests with spreadsheets ridiculous - it changes the game.”

Simon Mulcahy — Salesforce

Event Check-In

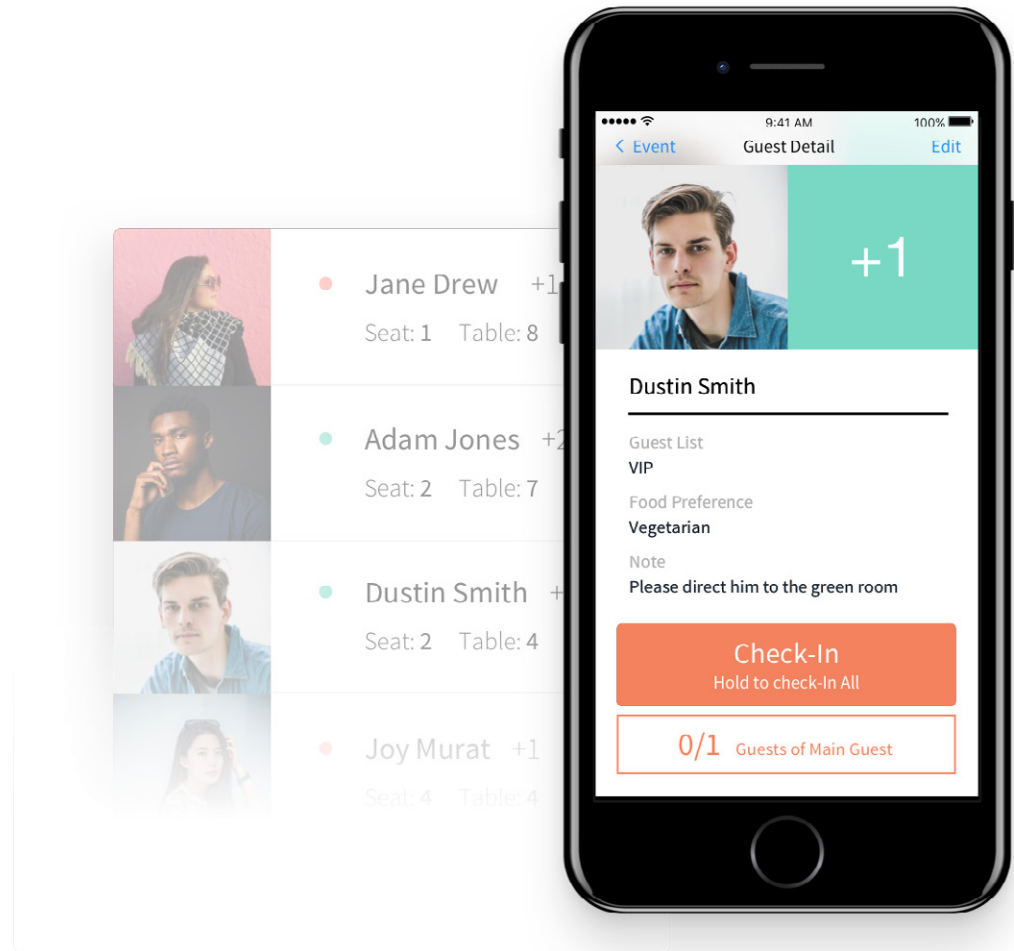

The leading guest list app used by the
world's top event professionals.

Fast & reliable check-in app for iOS and Android

Find and check-in guests in seconds, thanks to blazing fast and stable apps on all iOS and Android devices, relied on by event planners worldwide.

Check in guests and plus-ones at the same time

It's easy to keep the line moving no matter how big a party shows up. Check-in controls are designed for speed and ease of use, and can handle multiple plus-ones at a time.

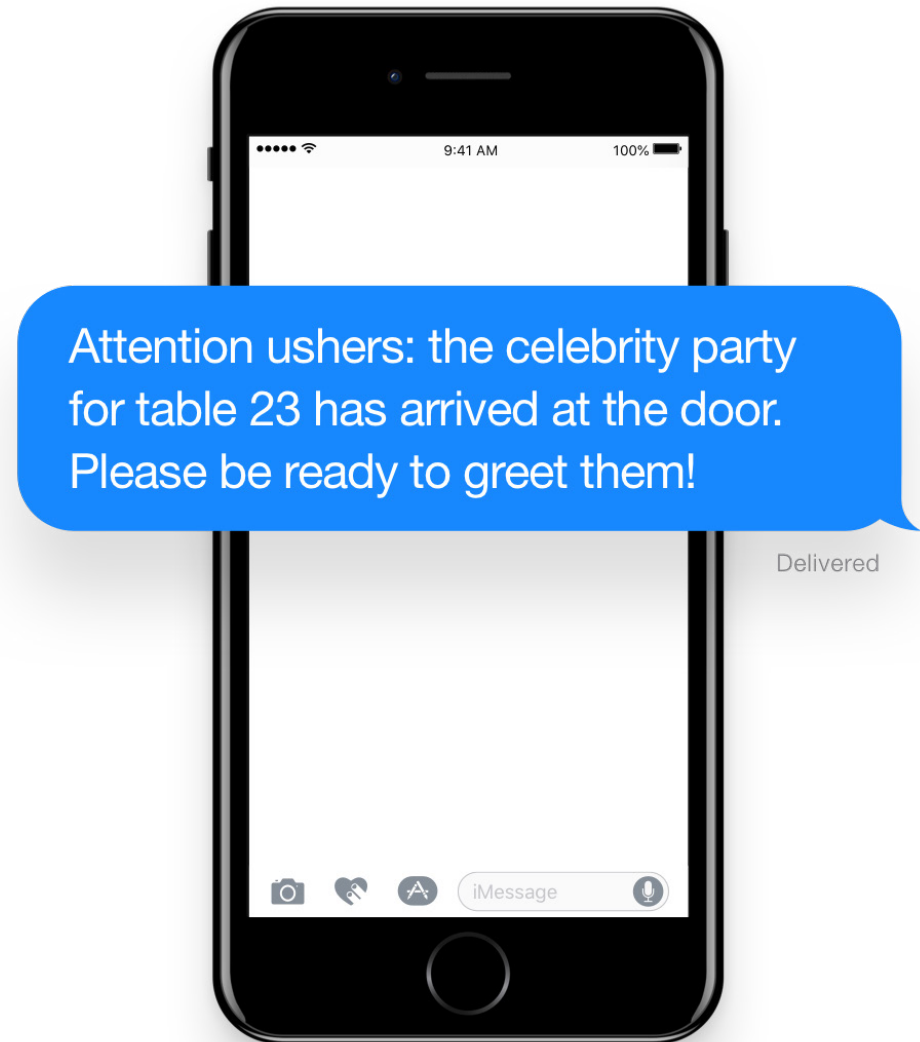

Add text alerts for guests or event organizers

Keep everyone in the loop with text alerts that can tell your staff when VIPs arrive, your guests their table number after check-in, and more.

Always reliable, even if the wifi goes out

All mobile check-in activity is saved locally if the connection drops, and automatically resyncs across all devices once service is restored.

On-site name badge printing for everyone

Instantly print name badges for guests and their group on local wireless printers. No mistakes in guest info, no wasted time or paper on no-shows, and professional badges for every attendee.

Flexible configuration for any events team

Manage access for check-in teams and clients

It's easy to give front-of-house permission to only check-in, or to create a view-only account for clients.

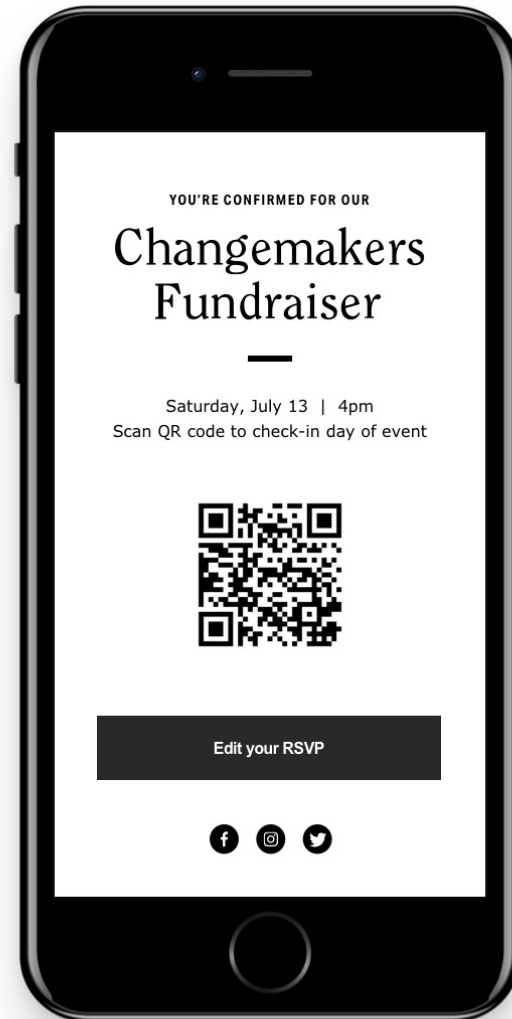

Hide private guest info on the check-in app

Expecting high-profile attendees? Just toggle off private info so it doesn't show at check-in, but stays in the guest list.

Check in using QR codes straight from your RSVPs

Speed up your check-in process even more by generating QR codes with zkipster, or import from elsewhere, seamlessly connected from online invitations to your guests walking in the door.

“There is no more paper and there are no more lines for our guests at event check-in.”

AnnMari Shannahan — amfAR

Flexible Pricing Options

From simple plans with just the check-in basics to bespoke tools and integrations for advanced guest management at special events.

Unlimited plans for professional teams

Focus on your guests without worrying about limits. All subscriptions include unlimited guests and events, hands-on support, and advanced tools scaled to your team.
