CDN Pricing

CDN (Content Delivery Network) Pricing

The cost of Arvancloud CDN (Content Delivery Network) is calculated based on the usage pattern. The usage pattern is calculated per hour and based on four criteria: cache fill, cache egress, number of HTTP/HTTPS requests, and the number of requested cache purges.

ArvanCloud offers free Cloud CDN service for users up to 50 GB traffic and 1 million requests per month.

Cache Fill

The traffic received by CDN edge servers through origin servers is called Cache Fill.

Costs of Cache Fill usage (1 GB/Month)	
First 20 GB	Free
More Traffic	0.037 €

Cache Egress

The traffic sent from the CDN edge servers and received by users is called Cache Egress. Cache Egress is an essential component of website traffic or most-visited pages.

Cache Egress charges vary based on geolocation, and the prices descend based on the stepwise pricing mechanism.

Costs of Cache Egress usage (1 GB/Month)		
Middle East Traffic	**Europe and US Traffic**	**China and Other Countries**
First 50 GB	Free	Free	Free
Next 100 GB	0.037 €	0.050 €	0.050 €
Next 500 GB	0.035 €	0.050 €	0.050 €

Costs of Cache Egress usage (1 GB/Month)

More Traffic	0.012 €	0.018 €	0.025 €

Request

The number of web requests by users and responses by CDN edge servers, either in HTTP or HTTPS, will be calculated in this section.

The first 1 million requests are free of charge for each domain during a month.

Costs of HTTP/HTTPS requests per month	
First 1 million Requests	Free
More Requests	0.00125 €/10K requests

Cache Purge Request

If a file is cached on CDN edge servers and the sysadmin wants to delete it before the retention time expires, he/she needs to request a purge in the panel or through ArvanCloud API. This request is used for deleting one specific file or all the cached files.

The first 200 cache purge requests are free of charge for each domain during a month.

Costs of Cache Purge requests per month	
First 200 Purge Requests	Free
More Purge Requests	0.006 €/Each request
