

All-In-One Employee Time Tracking & Workforce Solutions

Simplify your timesheets, payroll and accounting today within minutes

Why Choose Boomr

- Boomr simplifies and automates the process of recording time spent at work for employees.
- With our one-click onboarding, employees can start tracking time from their mobile device within minutes.
- Our intuitive, geolocation driven and mobile-first experience means no more paper timesheets, no more clunky, outdated hardware or complicated software.
- Our notification tools alert employees to take mandated breaks and automatically clock them out when certain shift durations are met, which means timesheets are more accurate than ever.
- All hours worked data is made available in real-time through our web-based management dashboard, allowing business owners and their managers to view who is working, and where they are working, with absolute precision
- Customers know what their labor costs are on a shift-to-shift, day-to-day basis, so there are no surprises when payroll is due.
- Boomr calculates and projects overtime, notifying employers when specific employees are approaching the overtime threshold.

Summary of Service Offerings

Here are some of the core features that our customers love:

- **One-click Employee Onboarding** - No training required, when employees are added we send a unique Invite Code by email and SMS that allows the employee to self-onboard and be tracking time within minutes.
- **GPS/Geofence** - when an employee clocks in or out, that data is timestamped and also geocoded providing insights to where employees are working.
- **Overtime Watch** - monitors overtime in real-time based on federal and state requirements.
- **Live Notes** - employees can communicate with team members and managers about their shift, they can also upload photos and all notes data is attached to the shift when recorded.
- **Project Tracking** - employees can track time against projects that are assigned to them, and associate that time to the specific shift in which they performed the work.
- **Job Codes** - Boomr Job Codes give you the flexibility to track multiple rates with just a few clicks.
- **Multiple Offices** - Apply custom overtime settings to each office individually, while still managing your entire team all in one place.
